## **For Safer and More Comfortable Teleworking Launch of Digital Workplace Solutions**

We are pleased to announce, as shown on the attachment, that TOKAI Communications (hereinafter “TOKAI COM”), a wholly-owned subsidiary of the Company, will offer a range of digital workplace-related services by Internet Initiative Japan Inc. (hereinafter “IIJ”) designed to support enterprise teleworking environments to customers who are using TOKAI COM’s carrier and enterprise telecommunications service BroadLine.

In response to the spread of the new coronavirus, the demand for enterprise teleworking is increasing rapidly, and the demand for remote access-related services is also increasing rapidly. This time, TOKAI COM has interconnected the carrier and enterprise telecommunications service BroadLine with IIJ’s cloud infrastructure that provides various related services for safer and more comfortable teleworking. This makes it easier for BroadLine customers to use IIJ’s various digital workplace-related services.

TOKAI COM will contribute to shaping new businesses for our customers by providing digital workplace-related services that not only assist further use of cloud services and work style reform for better productivity and work efficiency but also reinforce the relationship among employees.

## TOKAI Communications Launches Digital Workplace Solutions

TOKAI Communications Corporation (President and Representative Director: Yasuhiro Fukuda; hereinafter “we”) is pleased to announce that we started offering a range of digital workplace solutions by Internet Initiative Japan Inc. (President and COO: Eijiro Katsu, hereinafter “IIJ”) to customers who are using our carrier and enterprise telecommunications service BroadLine “Relation Ethernet.”

### 1. Background

Given the growing popularity of cloud services, we are actively promoting line connections with a number of major cloud services and working on planning and development of telecommunications services that can flexibly support various customer usage scenarios. Based on technologies and know-how we have cultivated over many years as a system integrator, we provide a one-stop service that covers all the processes from deployment consulting to design, construction, monitoring, and operation of cloud services.

As the working environment using not only cloud services but also teleworking and web conferencing systems is rapidly being digitalized, we have interconnected the network infrastructure between IIJ and us so that customers using our telecommunications services can safely use IIJ’s various solutions for realizing digital workplaces.

### 2. Service overview

We provide safe and comfortable digital workplaces through various solutions deployed on high-speed and stable infrastructures.

#### Services provided

Cloud exchange	Closed-network connection with IIJ GIO, Office 365, and other cloud services for reliable communications
Cloud routing	Automated proxy exclusion and optimum routing when using Office 365
High-speed and stable remote access	Remote access functions that eliminate slow communication speed and frequent disconnection, which have been issues in previous VPNs
Web filter link	Integration of features required for web security, such as URL filtering, antivirus functions, and web proxy

Supported services: our carrier and enterprise telecommunications service BroadLine “Relation Ethernet”

Price: Quoted individually

\*For more information, please contact our sales representative.

### 3. Future efforts

We will contribute to shaping new businesses for our customers by providing digital workplace solutions that not only assist further use of cloud services and work style reform for better productivity and work efficiency but also reinforce the relationship among employees.
